## **CAGE-AID Substance Abuse Screening Tool**

**<u>Directions:</u>** Ask your patients these four questions and use the scoring method described below to determine if substance abuse exists and needs to be addressed.

## CAGE Questions Adapted to Include Drug Use (CAGE-AID)

- 1. Have you ever felt you ought to cut down on your drinking or drug use?
- 2. Have people annoyed you by criticizing your drinking or drug use?
- 3. Have you felt bad or guilty about your drinking or drug use?
- 4. Have you ever had a drink or used drugs first thing in the morning to steady your nerves or to get rid of a hangover (eye-opener)?

**Scoring:** Item responses on the CAGE questions are scored 0 for "no" and 1 for "yes" answers, with a higher score being an indication of alcohol problems. A total score of two or greater is considered clinically significant.

\*\*\*\*The normal cutoff for the CAGE-AID is two positive answers, however, it is recommended that the primary care clinicians lower the threshold to one positive answer to cast a wider net and identify more patients who may have substance abuse disorders. A number of other screening tools are available.
