

Quantitative Drug Testing Information Form

NOTE: Quantitative Drug Testing is NOT required for Emergency Department, (ED, Urgent Care, Inpatient settings and for Children less than 6 years of age.

INSTRUCTIONS: Use this questionnaire in conjunction with the MHS Prior Authorization Request Form to request quantitative drug testing for the following tests listed in the grid below and Fax to (866) 467-1316.

*****Please make sure to mark request as "URGENT" (NO physician signature required in this instance). Authorization decision will be provided to requesting provider and lab within 72 hours of request*****

Member's Name _____ DOB _____

Lab Provider to perform test: _____

Lab Phone # _____ Lab Fax # _____

1. Was a qualitative drug test completed? YES/ NO
2. What findings from the qualitative drug test, (either positive or negative), are inconsistent with the expected results as suggested by the patient's medical history, clinical presentation, and/or member's own statement after a detailed discussion about their recent medication and drug use?
List the drugs here: (for example, + cocaine, -opiate):
3. What is the required Quantitative Test to address the inconsistent result in question #2? (please circle)

CODE	DESCRIPTION
G0480	Drug test(s), definitive, utilizing drug identification methods able to identify individual drugs and distinguish between structural isomers (but not necessarily stereoisomers), including, but not limited to GC/MS (any type, single or tandem) and LC/MS (any type, single or tandem and excluding immunoassays (eg, IA, EIA, ELISA, EMIT, FPIA) and enzymatic methods (eg, alcohol dehydrogenase)); qualitative or quantitative, all sources, include
G0481	Drug test(s), definitive, utilizing drug identification methods able to identify individual drugs and distinguish between structural isomers (but not necessarily stereoisomers), including, but not limited to GC/MS (any type, single or tandem) and LC/MS (any type, single or tandem and excluding immunoassays (eg, IA, EIA, ELISA, EMIT, FPIA) and enzymatic methods (eg, alcohol dehydrogenase)); qualitative or quantitative, all sources, includes specimen validity testing, per day, 8-14 drug class(es), including metabolite(s) if performed (per Calendar Year 2016 Clinical Laboratory Fee Schedule)
G0482	Drug test(s), definitive, utilizing drug identification methods able to identify individual drugs and distinguish between structural isomers (but not necessarily stereoisomers), including, but not limited to GC/MS (any type, single or tandem) and LC/MS (any type, single or tandem and excluding immunoassays (eg, IA, EIA, ELISA, EMIT, FPIA) and enzymatic methods (eg, alcohol dehydrogenase)); qualitative or quantitative, all sources, includes specimen validity testing, per day, 15-21 drug class(es), including metabolite(s) if performed. (per Calendar Year 2016 Clinical Laboratory Fee Schedule)
G0483	Drug test(s), definitive, utilizing drug identification methods able to identify individual drugs and distinguish between structural isomers (but not necessarily stereoisomers), including, but not limited to GC/MS (any type, single or tandem) and LC/MS (any type, single or tandem and excluding immunoassays (eg, IA, EIA, ELISA, EMIT, FPIA) and enzymatic methods (eg, alcohol dehydrogenase)); qualitative or quantitative, all sources, includes specimen validity testing, per day, 22 or more drug class(es), including metabolite(s) if performed. (per Calendar Year 2016 Clinical Laboratory Fee Schedule)
