Policy Overview

According to CMS, “The National Quality Forum (NQF) defines Never Events as errors in medical care that are of concern to both the public and health care professionals and providers, clearly identifiable and measurable (and thus feasible to include in a reporting system), and of a nature such that risk of occurrence is significantly influenced by the policies and procedures of the health care organization.”

The Health Plan will not reimburse for services associated with Never Events. Moreover, providers are not permitted to bill members for never events.

To be included on NQF’s list of “never events”, an event must be characterized as:

- Unambiguous - clearly identifiable and measurable, and thus feasible to include in a reporting system;
- Usually preventable - recognizing that some events are not always avoidable, given the complexity of health care;
- Serious - resulting in death or loss of a body part, disability, or more than transient loss of a body function; and
- Any of the following:
 - Adverse
 - Indicative of a problem in a health care facility’s safety systems
 - Important for public credibility or public accountability

Services and procedures associated with never events include but are not limited to:

- Surgery performed on the wrong body part
- Surgery performed on the wrong patient
- Wrong surgical procedure performed on a patient
- Intraoperative or immediately post-operative death in an ASA Class I patient
- Patient death or serious disability associated with the use of contaminated drugs, devices, or biologics provided by the healthcare facility
- Patient death or serious disability associated with the use or function of a device in patient care, in which the device is used or functions other than as intended
- Patient suicide, or attempted suicide resulting in serious disability, while being cared for in a healthcare facility
- Maternal death or serious disability associated with labor or delivery in a low-risk pregnancy while being cared for in a health care facility, including events that occur within 42 days post-delivery and excluding deaths from pulmonary or amniotic fluid embolism, acute fatty liver of pregnancy, or cardiomyopathy
- Death or serious disability (kernicterus) associated with failure to identify and treat hyperbilirubinemia in neonates
- Patient death or serious disability due to spinal manipulative therapy

PAYMENT POLICY NEVER PAID EVENTS

- Any incident in which a line designated for oxygen or other gas to be delivered to a patient contains the wrong gas or is contaminated by toxic substances
- Patient death or serious disability associated with the use of restraints or bedrails while being cared for in a healthcare facility

Application

This policy applies to physicians and hospitals.

Reimbursement

The Health Plan’s code auditing software flags all provider claims billed with modifiers **-PA, -PB, or -PC**. These services deny when billed.

The Health Plan will reimburse physicians for follow up care that is required as a result of a never event only when they are not the physician responsible for the never event.

Utilization

Rationale for Edit

Never events are serious adverse events that in the majority of cases are preventable and should never occur in healthcare. These events are of concern to both the public and healthcare providers. CMS has determined that these events are non-reimbursable. Monitoring these occurrences is intended to encourage hospitals to improve patient safety and to implement standardized protocols.

Documentation Requirements

CMS guidelines require Outpatient, Ambulatory Surgical Centers, and Practitioners to use the following modifiers to identify medical mistakes or errors: **PA** (Surgery Wrong Body Part), **PB** (Surgery Wrong Patient) and **PC** (Wrong Surgery on Patient).
